BUSINESS INTELLIGENCE DEVELOPER (M/F/D) (ANALYTICS)

Full-time (40h) // Morrisville, US // Relias LLC // Job-ID: 53601

Job duties

Operational:
• Developing and testing custom reports and dashboards utilizing Power BI and MS Reporting Services
• Designing, developing and testing Extract, Transformation, and Loading (ETL) SSIS packages
• Working with Implementation Project Teams and Clients to determine individual Project Business Intelligence requirements and convert them to technical requirements
• Working to ensure data consistency and integrity by identifying data discrepancies and data quality issues and implementing solutions.
• Reviewing ETL workflows for performance and recommending technical and process improvements
• Writing technical and management systems reports and preparing data extracts
• Responding to and resolving load failures and performance issues
• Having a strong focus on automation of the operational ETL and reporting environments

Strategic:
• Evaluating and implementing appropriate Data Analysis, Reporting, ETL and Data Quality technologies, and other business intelligence tools, to support timely, high quality and cost-effective delivery of our solutions.
• Helping to build a highly efficient, automated and scalable operational environment.
• Participating and promoting an environment of innovation and experimentation.
• Identifying deviance from industry standards and suggesting modifications to ensure best practices.

Job requirements
• Bachelor’s degree
• ETL and Report creation technology, specifically experience in implementing projects using Microsoft technologies (PowerBI, .Net, TSQL SQL Server, SSIS, SSAS, SSRS)
• Technical experience in the areas of data analysis, database design, ETL, and data governance.
• Experience with data-driven testing approaches used in OLAP and Business Intelligence.
• Excellent communication skills including the ability to prepare and present reports to a range of audiences
• Experience with healthcare claims data
• 1-2 years of experience
